BUSINESS & DATA ANALYST

Data Analytics | Business Intelligence | Data Visualisation | Business Insights

Business Analyst with hands-on experience solving healthcare, customer and operational problems through data, supported by 8 years of international experience in aviation and logistics. Skilled in translating business requirements into analysis and actionable recommendations using Python, R, SQL, Tableau and Excel. Combines analytical problem-solving with strong stakeholder communication and cross-functional experience.

KEY SKILLS

Data Analysis: Data Cleaning & Validation | Exploratory Data Analysis | Statistical Analysis | Customer & Marketing Analytics

Programming & Databases: Python | R | SQL | PostgreSQL

Visualisation & Reporting: Tableau | Advanced Excel | Dashboard Development | KPI Reporting

Business Analysis: Requirements Analysis | Stakeholder Communication | KPI Analysis | Process Improvement | Data-Driven Recommendations

EXPERIENCE

Data Analyst - Data Analytics Career Accelerator

02/2026 – 09/2026

London School of Economics and Political Science (LSE)

Intensive Data Analytics Career Accelerator, delivering end-to-end analytics projects using Python, R, SQL, Tableau and Excel to analyse complex datasets, identify business trends and translate findings into stakeholder recommendations.

Cancer Support Netherlands (CSN) – Patient Navigator | Employer Partner Project

- Addressed fragmented healthcare information for international cancer patients by translating 26 patient questions into analytical requirements and building a traceable English knowledge base of 1,378 records from eight trusted sources.
- Validated 260 semantic-search results to quantify information coverage and identify critical gaps in waiting times, English-speaking providers and patient support; prioritised content gaps and informed requirements for CSN's future Patient Navigator.

Turtle Games – Customer & Loyalty Analytics

- Investigated how Turtle Games could improve customer loyalty and sales performance by analysing 2,000 customers using regression, decision trees, clustering, NLP and statistical testing; found spending behaviour to be a stronger loyalty driver than demographics.
- Identified 330 high-remuneration, low-spending customers (16.5%) as a priority growth segment and translated findings into targeted CRM, retention and personalised-reward recommendations.

NHS England – Appointment & Capacity Analysis

- Analysed NHS appointment data from 2020–2022 to assess demand, workforce utilisation and access patterns across NHS networks; identified peak-demand periods, high-volume regions and limited spare capacity.
- Found 1.5M+ missed appointments in October 2021 alongside rising demand, highlighting an opportunity to improve capacity utilisation and informing recommendations for workforce planning, appointment management and resource allocation.

VIP Flight Attendant

04/2017 – 01/2025

Kuwait Airways

Delivered personalised service for HNWI passengers while ensuring the highest standards of cabin safety and emergency preparedness and maintained a sophisticated, high-touch environment, upholding the airline's reputation for exceptional hospitality and operational excellence.

- Managed cross-functional in-flight operations across 5,500+ hours, maintaining 100% safety compliance and operational efficiency under high-pressure conditions.
- Liaised with logistics, catering, and operations teams to ensure seamless customer experience.
- Executed end-to-end service delivery for HNWI over a 5-year period, driving consistent, year-over-year increases in 'Excellent' ratings during annual customer experience audits.

Logistics Coordinator

09/2015 – 03/2017

Delta Express Inc.

Managed end-to-end freight solutions across North America, ensuring efficient, timely transport for diverse client shipments ranging from LTL to complex cross-border hauls.

- Coordinated over 300 shipments monthly across the U.S., Canada, and Mexico, optimising routes for advanced heavy haul and refrigerated shipping, resulting in 15% cost reduction.
- Ensured 100% freight tracking accuracy for brokers, elevating customer satisfaction rates by 20%.
- Managed high-volume documentation and database systems.
- Led a brokerage team to streamline logistics workflows, ensuring on-time delivery across North American supply chains.
- Drove a 30% increase in client retention by developing and launching a targeted B2B loyalty initiative alongside key US freight brokers.
